

Node mass balance

Dashed = perfect balance; color = match fraction

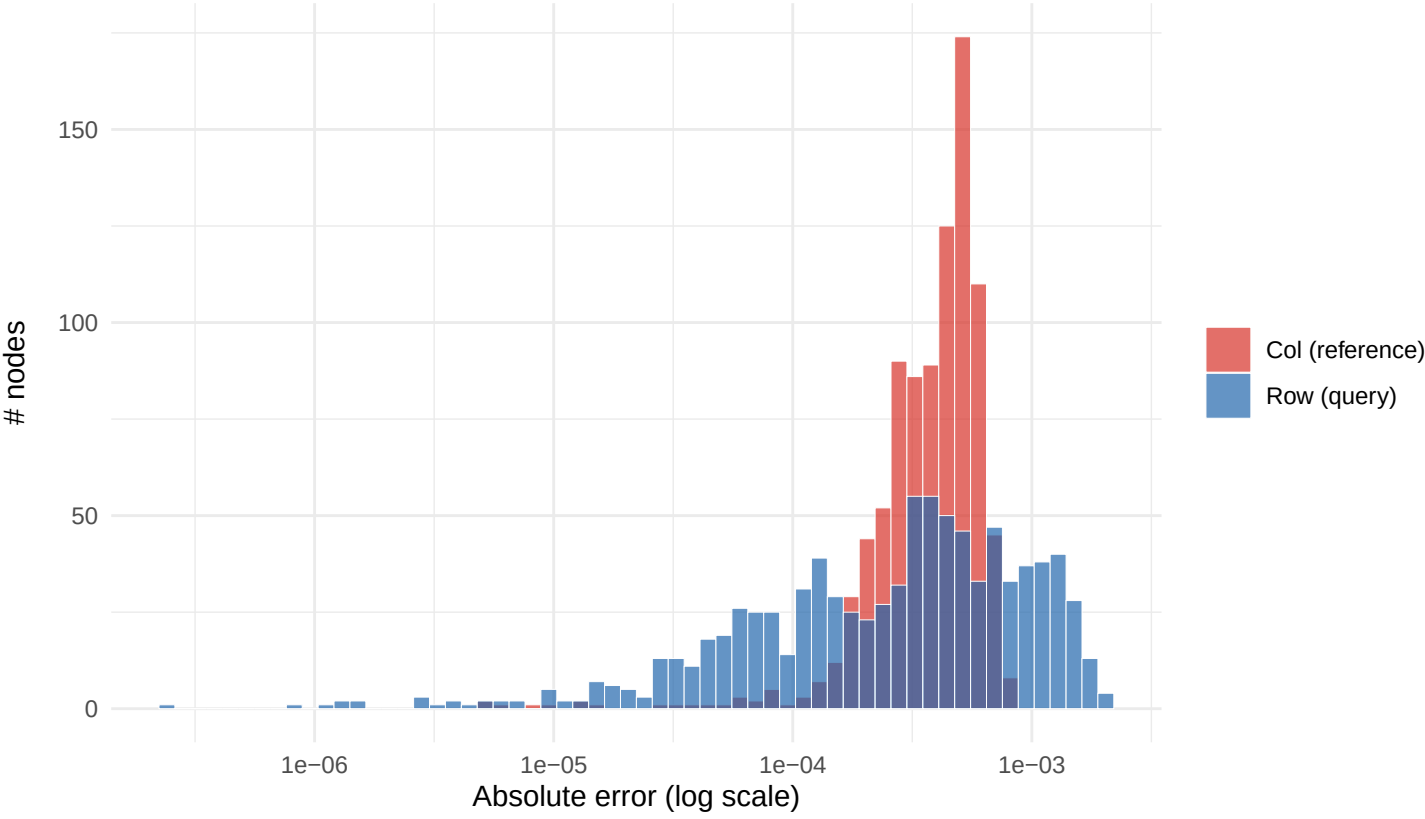

Match fraction per query node

1 / 900 nodes below 0.05 | median = 1.000

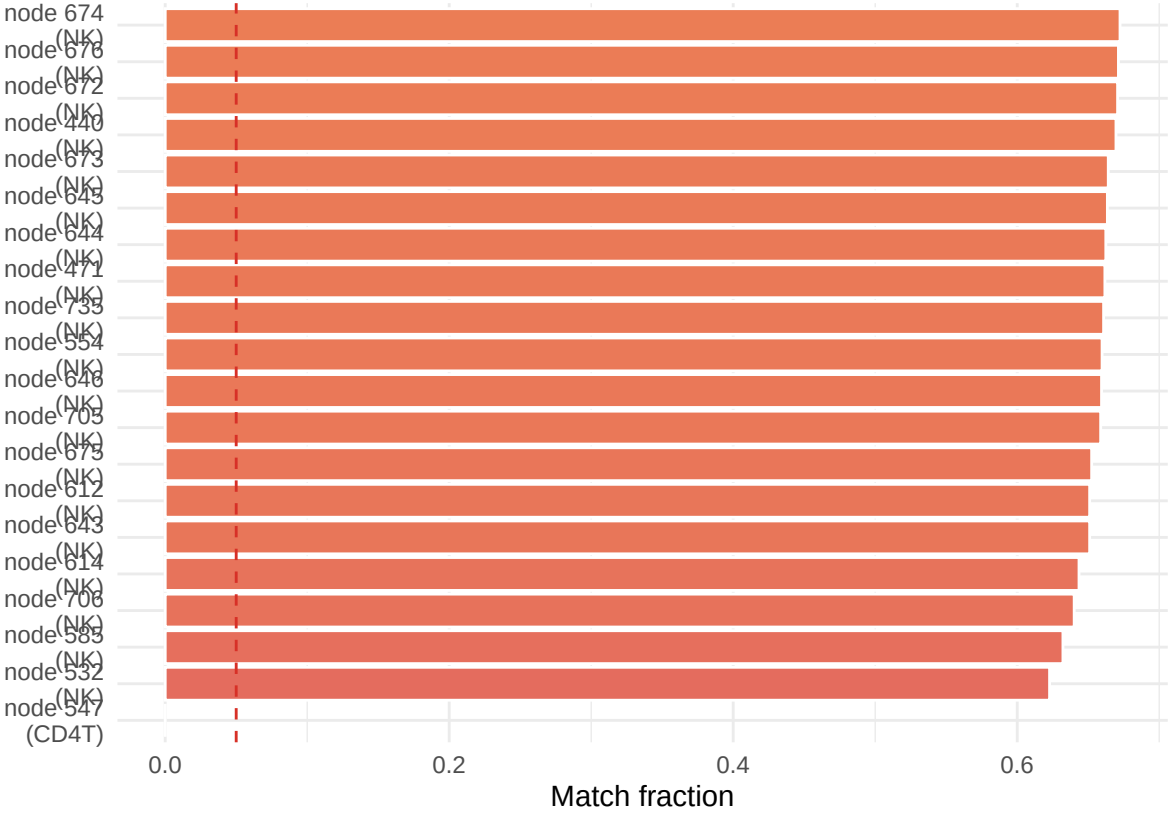

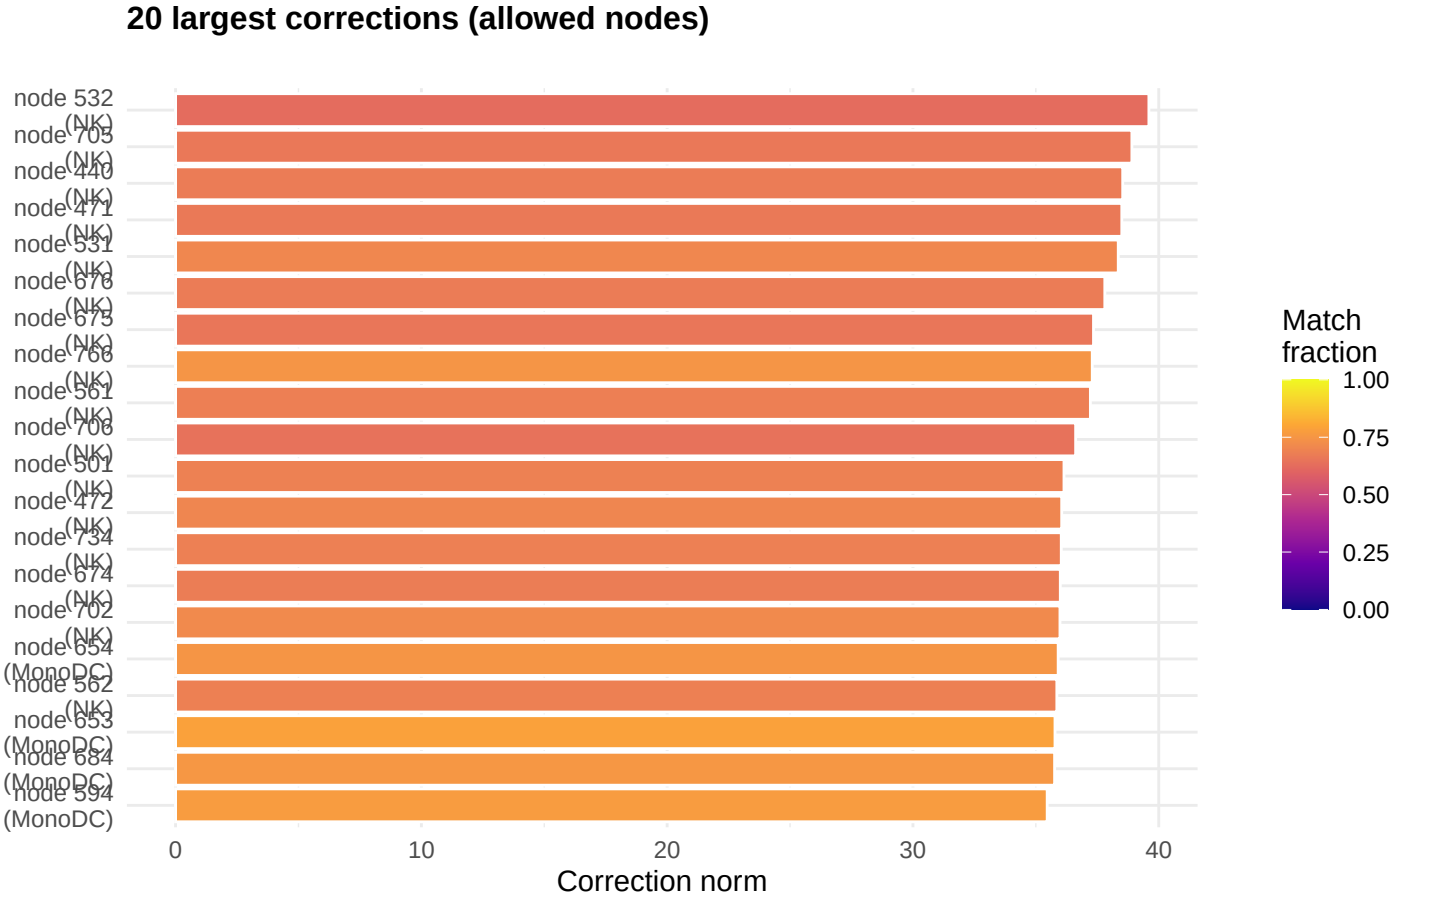

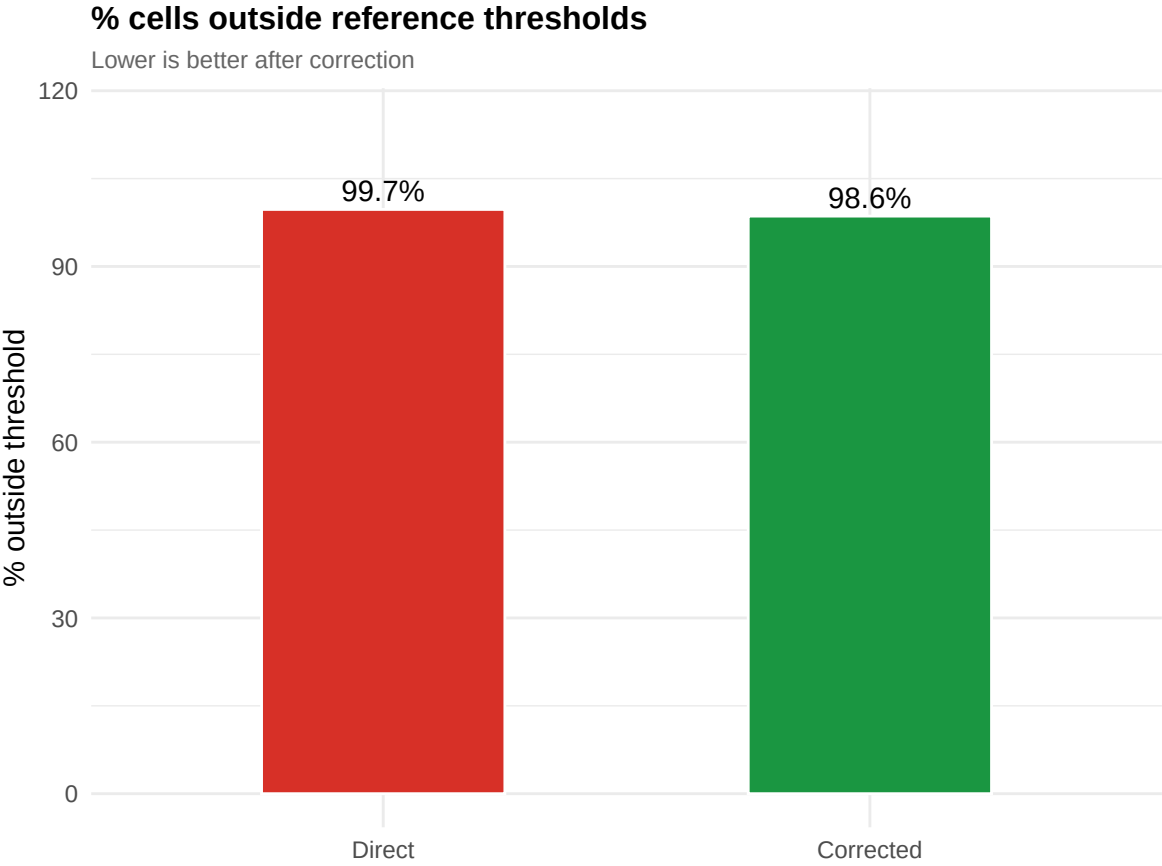

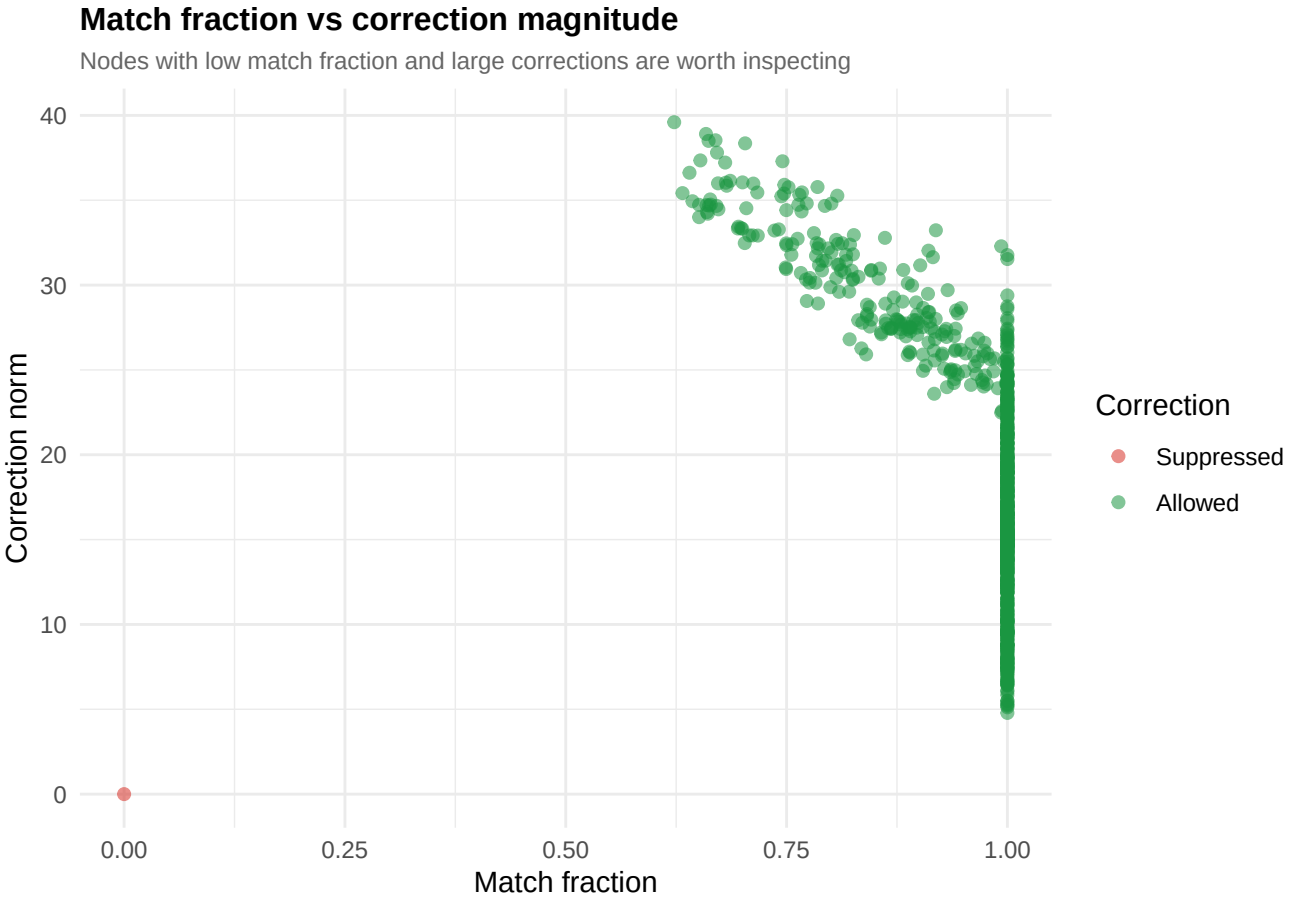

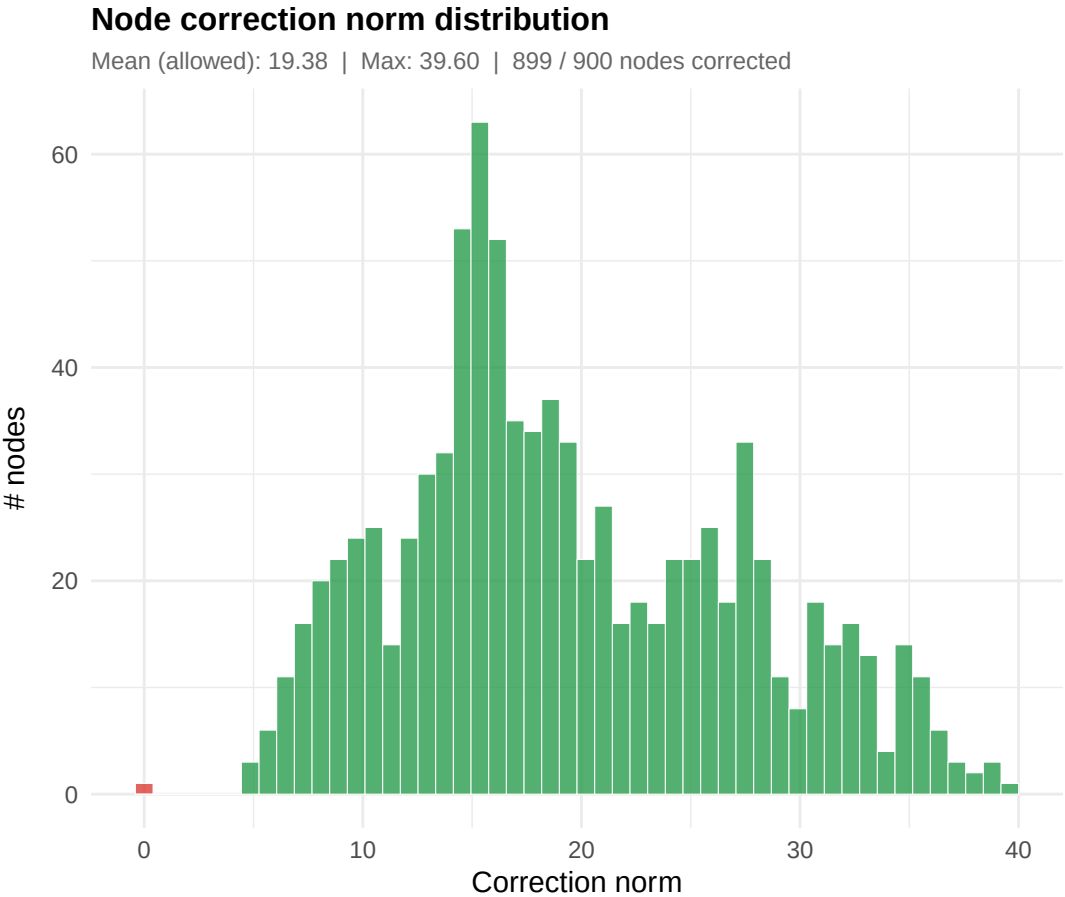

Marginal mass error

Max row: 2.0e-03 | Max col: 8.2e-04 | Converged: TRUE

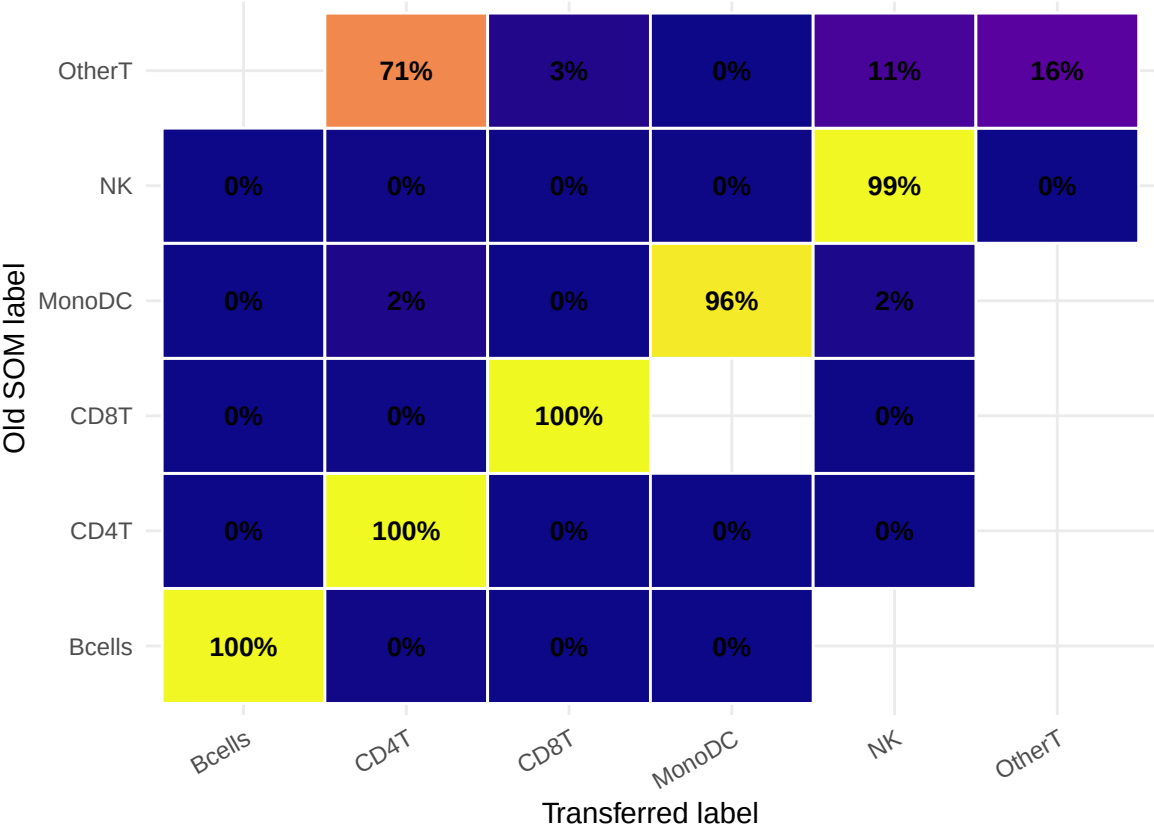

20 worst query nodes (match fraction)

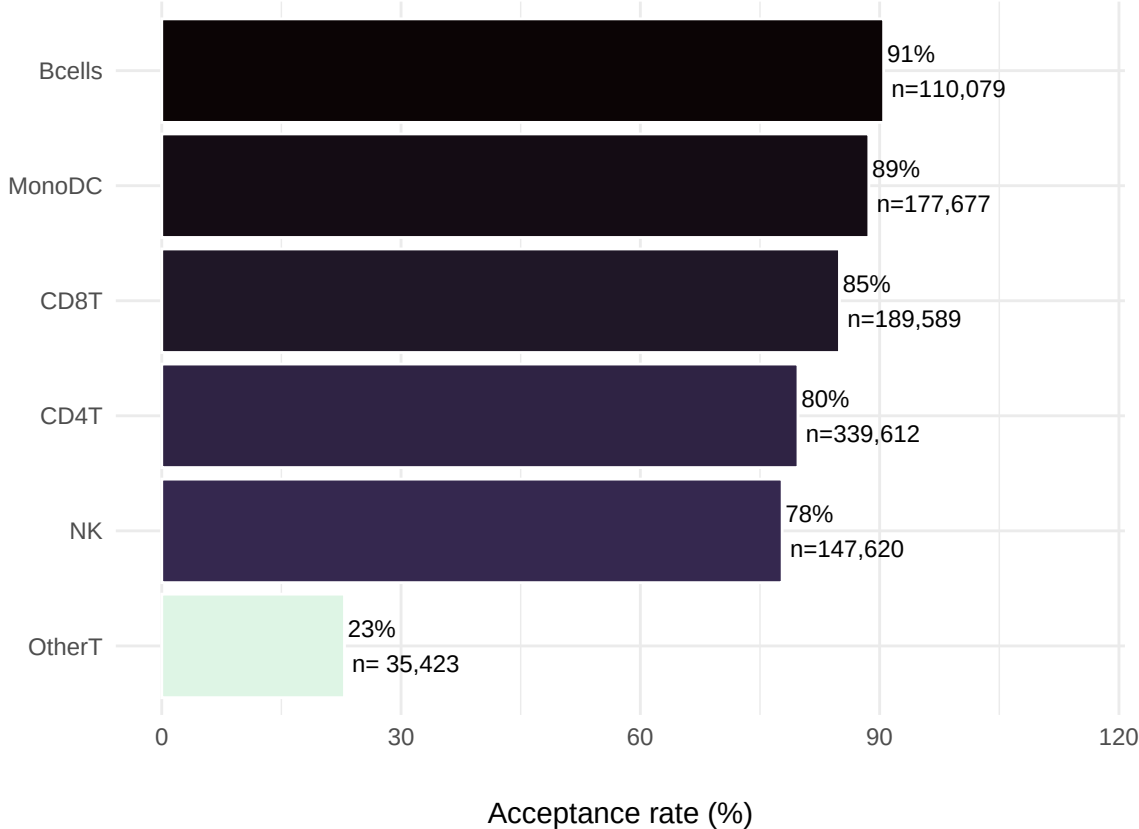

Label transfer confusion (accepted cells)

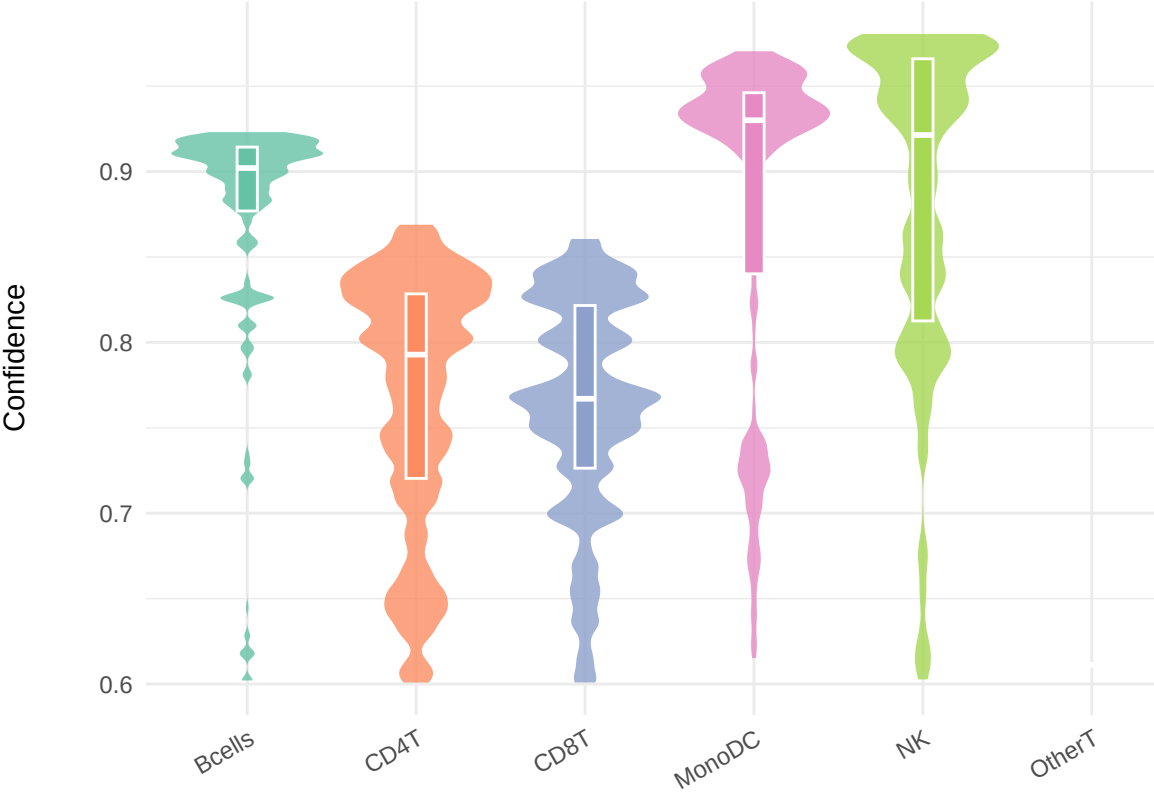

Row-normalized: each row sums to 100%

Acceptance rate by old label

Label confidence distribution (accepted)

20 nodes with lowest label acceptance (>=50 cells)
